

TAMINO x2

TAMINO x2

"Tamino is given a magic flute which will protect him and which has the power to turn sorrow to joy." Turning sorrow to joy is certainly one of the numerous virtues of music.

The Tamino x2 is one of Verity's most endearing loudspeakers. It is a great performer that will give a touch of magic to your favorite recordings. Its compact-size mini-tower configuration makes it an ideal loudspeaker for those who look for quality at either reasonable price or limited space requirements.

The Tamino is a true Verity product in every sense and preserves Verity's enduring commitment to design, manufacture, and market loudspeakers of exceptional beauty and performance.

Tamino x2

The Tamino loudspeaker is an elegant mini-tower two-way loudspeaker featuring an excellent midrange. The midrange cone is formed with TPX material. This lightweight, functional polymer displays a unique combination of physical properties and characteristics due to its distinctive molecular structure. It makes it an excellent material for midrange reproduction bringing musicality and uncolored sound reproduction. It conveys to the Tamino a nice, full mid-bass to lower mid sound quality. Also the Tamino voice coil former is equipped with a dynamic damping system that confers good performance and reliability at even overload conditions. The midrange is then coupled to a very good 3/4" (19mm) soft-dome tweeter showing very good transient response giving fast and natural high frequencies.

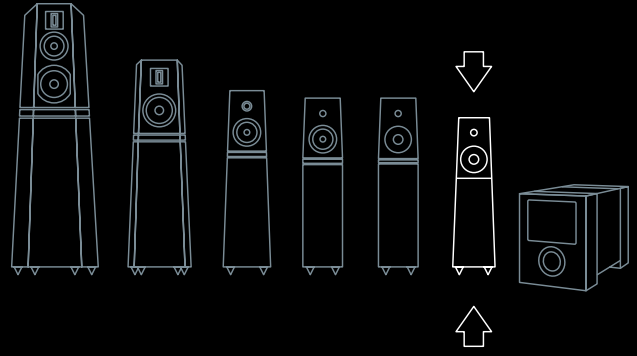

The Tamino x2 is configured in a bass-reflex enclosure having its port located at the rear. This configuration gives an extended and powerful bass performance. The Tamino x2 will perform very well in a variety of room dimensions.

A very few compromises has been done in its conception. It features the same high-quality finishing and share several components that we already use in our most exquisite loudspeakers.

All Verity designs are crafted with a balance of science and art. It is only through this tradition that the spirit of knowledge and craftsmanship come alive.

Please contact your nearest Verity dealer and experience the Tamino today.

TAMINO x2
