SURROUND SYSTEMS

Home Theater Applications

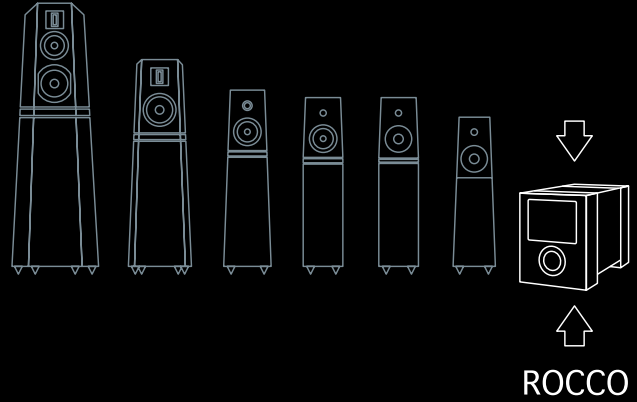

Why the Rocco is so different? It's simply a true subwoofer engineered according to some fundamental rules. Its inherent acoustical design allows the Rocco to function down to a true 20 Hz with no artificial electronic equalization. The importance of this shouldn't be sold short. Typical practice is to reduce cabinet size (and cost) by using a sealed box enclosure and then equalizing the limited frequency response to get some extension. The Rocco delivers some major benefits in comparison to equalized subwoofers:

- Large ported enclosure to efficiently extend the bass response without applying additional stresses to the drive units;
- Dual long-throw 12-inch drivers provides sufficient cone surface to minimize cone displacements and increase linearity;
- Added vibration-canceling structure minimizes any stray energy that could be radiated by the cabinet;
- High power headroom fully rated at twice the power requirement for maximum cone displacement.
- Very sophisticated and inaudible dynamic optimization circuitry prevents the bass unit to go beyond maximum displacements;
- No-compromise amplification, the power is provided by a superb ice-power amplifier having its nominal power at an impressive 1 000 watts.

Because all Verity loudspeakers are designed to share a common philosophy of sound reproduction, any Verity loudspeaker combination will create a highly coherent and performing home-theater system.

- The eXR line including the Lohengrin and Sarastro loudspeakers – speakers for the ultimate sound reproduction performance and the uncompromised home-theater experience.
- The Parsifal Encore, Parsifal Monitor, and Fidelio Encore – speakers initially designed for high-resolution music reproduction but ideal when a home theater/surround music system of the highest standard is desired.
- The Rienzi and Rienzi Monitors, the Tamino X2, Center, and Vertical or Horizontal wall-mounted – speakers that, while less expensive than the Parsifal and Fidelio, offer a level of performance rarely found in home theater speakers.
- The Rocco – an ultimate subwoofer solution conceived to adapt to any sound system requiring authoritative and accurate infra bass.

SPECIFICATIONS

Bandwidth:	20 to 100 Hz maximum \pm 3dB
Woofers:	2 x 12" (320 mm) • long throw • high power
Gain:	
• RCA Inputs :	- ∞ to +6 dB
• XLR Inputs :	- ∞ to +12 dB
Maximum sound level pressure :	120 dB SPL @ 1% THD
Nominal power :	1000 watts rms

DIMENSIONS & WEIGHTS

W x D x H:	16.5 x 28.0 x 22.0" (415 x 715 x 560 mm)
Weight:	150 lbs (68 kg) 210 lbs (95 kg) packed / unit

CABINET FINISH

Standard:	High-Gloss Piano Black
Special Order:	High-Gloss Silver, Makore & Quilted Big Leaf Maple

FEATURES & ACCESSORIES

Isolation Spikes:	Solid brass with stainless steel lockable spikes
Top Platform:	3/4" (19 mm) tempered smoked glass
Transportation Case:	ATA « Air Transportation Association » metal case

www.verityaudio.com

Driven by a passion for excellence and focused on painstaking attention to detail, we are wholeheartedly committed to crafting sound systems capable of unveiling the timeless beauty of a true musical experience.

All Verity loudspeakers share a common trait, which is exceptional "Synergy". Our secret resides in the way we thoroughly integrate all ingredients to form a perfect balance.

You can contact Verity Monday through Friday from 9:00 A.M. to 5:00 P.M. Eastern Standard Time (EST), except on holidays.
